

FOR IMMEDIATE RELEASE

Royal Coatings, Inc. Showcases "Live Asset" and Underwater Coating Technologies at AMPP 2026

NEW ORLEANS, LA — March 15, 2026 — Royal Coatings, Inc., a global leader in high-performance protective paints and coatings, is proud to announce its participation at the AMPP 2026 Annual Conference + Expo. Attendees are invited to visit **Booth #554** to explore cutting-edge solutions designed for the most challenging marine and industrial environments.

Revolutionizing Asset Protection

Royal Coatings is highlighting two major technological breakthroughs at this year's conference:

- **EPA-Registered MIC Protection:** Advanced solutions specifically engineered to combat **Microbiologically Induced Corrosion (MIC)**, providing a proactive defense against biological degradation in critical infrastructure.
- **Next-Gen CUI Solutions:** High-performance coatings designed to mitigate **Corrosion Under Insulation (CUI)**. This technology is currently featured on the **cover of the 25th Anniversary issue of *CoatingsPro Magazine***, including an in-depth case study beginning on page 46.

Innovation Without Downtime

Under the leadership of President and CEO Mark Parker, Royal Coatings has pioneered "Live Asset" maintenance. Our proprietary formulations allow for application and **complete curing underwater**, enabling operators to protect essential infrastructure without costly shutdowns or dry-docking.

"Our mission is to provide the industrial and marine sectors with coatings that don't just protect, but also adapt to the environment," says Mark Parker. "Whether it's a submerged piling or a high-temperature insulated pipe, we provide the science to keep assets running longer."

Global Reach, Local Expertise

Headquartered in **New Orleans**, with a dedicated **Coatings Laboratory in North Carolina** and manufacturing capacity stretching from coast to coast, Royal Coatings supports projects across the globe. Our products are sold internationally, ensuring that world-class corrosion protection is available wherever it is needed.

Visit Us at AMPP 2026:

- **Location:** Booth #554
- **Website:** www.royalcoatings.net
- **Contact:** To schedule a technical consultation during the show, please visit us at the booth or contact our team via the conference app.

About Royal Coatings, Inc.

Royal Coatings, Inc. is a premier manufacturer of protective paints and coatings for the Marine and Industrial markets. Specializing in unique chemistries that allow for underwater curing and live asset maintenance, Royal Coatings provides innovative solutions to the world's most difficult corrosion problems.
